

Changing db snmp/sysman passwords? EM needs to know...

Posted On Aug 22, Posted by [SSTS](#) Category [Blog](#)

If you have a need to change the passwords for the sysman or db snmp users you will also need to edit configuration files used by Enterprise Manager. These files are
\$ORACLE_HOME/<hostname>.<instance_name>/sysman/config/emomes.properties and
\$ORACLE_HOME/<hostname>.<instance_name>/sysman/emd/targets.xml

The passwords may appear as encrypted. You can replace with clear text if you change the encrypted directives to FALSE.
